Model CR3 Rooftop

Evaporator & Condenser Incorporated in the One unit

The new Crisp-Air Model CR3 unit is a cabin roof mounted, air conditioning unit. Both the Condenser & the Evaporator are incorporated into the one assembly. This unit was specifically designed to be fitted to a wide range of Skid Steer & Track loader Machines and most importantly designed to be operated in the hot, dry & dusty conditions that these machines encounter on a daily basis.

We are able to supply our CR3 Roof unit from \$1900.00 Ex G.S.T. The basic unit includes remote mount switch box. (Roof adaptor pod available at additional cost.)

Crisp-Air CR3 Unit is rated at 4.8Kw or 16,300 Btu's

Features

- Clever design ensures rear visibility is not compromised
- An adapter pod can be designed for a wide range of Skid Steer / Track Loaders.
- A complete system will only raise the total vehicle height by 35-40mm still allowing for entry to sites where low vehicle height is critical.
- Unit includes washable return air filters.
- The unit is fully powdercoated for excellent durability & protection from the elements
- Attractive design will compliment any Skid Steer or Track loader
- Switch box including 3 Speed fan switch is included as part of the unit

All Crisp-Air units are designed and built right here in Queensland and are designed to suit our harshest conditions. Our vast industry experience coupled with our comprehensive warranty on our systems will give you total peace of mind, Ultimately providing more time for your machine to be making money, not down and costing you money
