# Skid-Steer Air Conditioning

The new Crisp-Air Model CR3 unit is a cabin roof mounted, air conditioning unit. Both the Condenser & the Evaporator are incorporated into the one assembly. This unit was specifically designed to be fitted to a wide range of Skid Steer & Track loader Machines and most importantly designed to be operated in the hot, dry & dusty conditions that these machines encounter on a daily basis.

We are able to supply and fit a cooling only system from \$4100.00 Ex G.S.T.

Crisp-Air CR3 Unit is rated at 4.8kw or 16,300 Btu's.

- Clever design ensures rear visibility is not compromised
- An adapter pod can be designed for a wide range of Skid Steer / Track Loaders.
- Attractive design will compliment any Skid Steer or Track Loader.
- The Unit is fully powdercoated for excellent durability & protection from the elements.
- The complete system will only raise the total vehicle height by 35-40mm still allowing for entry to sites where low vehicle height is critical.
- System includes washable return air filters.
- Optional heating is available in most cases.

All Crisp-Air units are designed and built right here in Queensland and are designed to suit our harshest conditions. Our vast industry experience coupled with our comprehensive warranty on our systems will give you total peace of mind, Ultimately providing more time for your machine to be making money, not down and costing you money
